

RemotePlus

Buggy Fleet Management

Control buggy fleets from the comfort of the pro-shop.

Golf buggy fleets can be controlled with a touch of a button with new REMOTEPLUS

a system which activates and deactivates buggies from the comfort of the pro-shop.

- > **No keys**
- > **Programmable shut-down**
- > **24 hour security**
- > **Up to 300 buggies**
- > **Compatible with any buggy**
- > **Easy to use**

For further information call SIS on: 01-456 8650 or visit us at golf.sisirl.com

RemotePlus

Features

All buggies are controlled by a single portable device which is kept in the pro-shop.

Operated by radio frequencies

No keys

Pro-shops can activate buggies for golfers without needing to issue keys. The buggy is quickly and simply activated on the REMOTEPLUS central control.

Portable & rechargeable

Systems are compact and can be activated anywhere. They are rechargeable and have an Auto Power Save function to help operations run smoothly at all times.

Real time control & active buggy response

Pro Shops can feel secure in the knowledge buggies can be activated and deactivated in real time.

24 hour security

All buggies can be controlled, 24 hours a day – even out of hours when the shop is closed.

Activation range of 50 yards

The system can control its fleet of buggies up to a maximum of 50 yards from the pro-shop.*

RemoteSync

With RemotePlus, we supply and install our RemoteSync software. This application will allow you at the end of each working day, week, month or year to ascertain your buggy statistics e.g. breakdown of how many buggy rentals, what buggies have been used most frequently, who sold and received money for a particular rental, and in general offer golf club management for all buggy activity. RemoteSync allows you to tailor your 24 hour security timings i.e. Global Shutdown.

All weather operation

The system operates consistently, whatever the weather.

Operator password control

Only authorised staff will be able to operate the system.

Menu option for fleet and single buggy use
